Subject: Microsoft Settlement

This case has many issues that blur the overwhelming need to get it over with. A fair settlement was reached but the states representing the businesses that are unable to compete in a very competitive industry are seeking to legislate an unfair advantage for themselves. That's not what America is all about. America is a FREE Market economy. Let the free market determine the winners and losers. The longer this case goes on the larger is the damage to my faith in the US legal system to successfully resolve this issue. Enough is enough! Get it over with! Free Microsoft of the shackles that are holding it back from maintaining America's leadership in this industry!
